Hello Jack,

Tried to send this to you earlier today but it bounced back as undeliverable due to the type of attachments.

I have therefore, compressed them into a Zip file and have attached this to the e-mail.

Can you confirm when you receive this e-mail?

Thank you,

Graham

Hello Jack,

Good talking earlier today.

I have now prepared a stripped down html page which contains two sections; the first section is just paragraphs of random text the 2nd is the map.

I have left the four original geojson layers in place but removed the single location Drumoig Golf Hotel.

I have attached all the files to this e-mail except two,

leaflet.js and jquery which are URL linked.

Let me know if you require any further information.

Regards,

Graham
